---

SUMMARY

Full-stack web developer, React, and Rails enthusiast with a love for clean code and accessible design. Pair-programming and remote work aficionado. Fluent in multiple languages, frameworks, and technologies, and capable of ramping up quickly and efficiently.

SKILLS

Front-End: JavaScript, React, Redux, HTML5, CSS3, Sass
Back-End: Ruby, Rails, PostgreSQL
Tools & Methods: Git, GitHub, Mobile/Responsive Development, RSpec, TDD, Jest, Chrome Dev Tools
Professional: Remote Pair-Programming, Teamwork, Mentoring

EXPERIENCE

HIGHLIGHTED PERSONAL PROJECTS   Remote
Full Stack Web Developer   November 2021 – June 2022

myBudget
- Built a full-stack mobile web app with Rails and PostgreSQL database to allow users to manage their budget, and transactions and keep track of how much money they spent and on what.
- Implemented authentication using devise gem and Authorized logged and registered users to access web app resources.
- Implemented unit and integration tests for models, requests, and features using RSpec and Capybara.
- Built with Rails, Ruby, Sass, and HTML. View the repository on GitHub

Covid-19 Tracker
- Built a mobile web application that provides the user with the new cases of Covid-19 for each country and also the regions within the country using React and Redux.
- Implemented tests for React components and Redux using Jest and React Testing Library.
- Retried data from API using Axios, stored it in the Redux store, and filtered the data using a stateless component.
- Built with React, Redux, CSS, and Jest. View the repository on GitHub

Rentar. — A web app that allows users to get a list of cars, and car details, reserve a car, and check their reservations list.
- Built RESTful API that served data to the JavaScript front-end using Rails.
- Worked alongside developers to build the front-end using React and Redux Toolkit and implement tests using Jest and React Testing Library.
- Provided feedback, reviewed code and conducted testing models and APIs requests using RSpec.
- Built with React and Rails. View the repository on GitHub

MICROVERSE   Remote
Mentor (Volunteer)   Mars 2022 – April 2022
- Mentored junior web developers, providing technical support through code reviews.
- Proposed improvements to code organization to improve code quality and overall performance.
- Provided advice and tips on how to maintain motivation to maintain longevity in the program.

EDUCATION

MICROVERSE   November 2021 –August, 2022
Remote Full Stack Web Development Program, Full Time
- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Developed skills in remote pair-programming using GitHub, industry-standard GitFlow, and daily standups to communicate and collaborate with international remote developers.

MOHAMMED V UNIVERSITY RABAT   September 2018 – July 2023
Bachelor of Physics (In Progress)
- Algorithms coursework.
- Programming in C language.
